PROFESSIONAL SUMMARY

Full-Stack Developer with 5 years of experience building production systems since 2021. Experienced in designing scalable microservices and web applications with Node.js, Python and Go, and responsible for backend design and DevOps on both legacy migrations and new builds. Works daily with AI coding agents (Claude Code, Cursor, Gemini) and builds MCP integrations. Strong background in OOP and typed languages (TypeScript, Go), and able to become productive in a new stack quickly.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Go, SQL
Backend & Architecture: Node.js, Express.js, NestJS, Flask, Microservices, REST and SOAP APIs, OpenAPI/Swagger, JWT/OAuth, RabbitMQ, Socket.IO, Redis
Frontend: React.js, Next.js, Vite, Tailwind CSS, React Native (Expo)
Databases: PostgreSQL (Sequelize, TypeORM, Prisma), TimescaleDB, Supabase, Redis, NoSQL (MongoDB, Firebase), MSSQL
DevOps & Cloud: Docker, Portainer, Traefik, Linux, Git, GitHub Actions, CI/CD, Cloudflare, GCP, AWS (EC2)
AI-Augmented Development: Claude Code, Cursor, Gemini, multi-agent orchestration, MCP integration, AI-assisted testing (Jest, Playwright)

PROFESSIONAL EXPERIENCE

Founding Engineer - YMS Lab *(Product Studio)* Mar 2026 - Present
- Developing the studio's own products: sesly.io (live) and Gozcu AI (see Projects)
- Developed all of the studio's websites: ymslab.io, sesly.io, gozcu.io and autoproff.ymslab.io

Software Developer - Arvonas Technology *(Kayseri - Remote)* Oct 2023 - Jan 2026
- Architected and delivered 5+ full-stack applications serving 100,000+ requests daily, building backend services with Node.js, Express, NestJS, and TypeScript on PostgreSQL
- Built a Python CDN proxy in front of Google Cloud Storage so files are no longer directly accessible from the bucket
- Integrated Redis caching across 4 core APIs and optimized DB calls, cutting average response times by 40% and reducing database load by 60%
- Set up and ran containerized deployments for 8+ services with Docker, Portainer and Traefik
- Developed a C#/.NET plugin for Milestone XProtect VMS using the MIP SDK (AI-assisted)

Software Developer - Oceannet Development *(Kayseri)* Aug 2021 - Sep 2023
- Led a 3-person team in designing and shipping 10+ backend microservices using Python and Node.js (TypeScript) for 2 years
- Migrated a legacy monolith to Node.js/Sequelize ORM architecture, reduced deployment time and critical bugs
- Developed 6+ custom ODOO ERP add-ons and microservices, automating workflows for 3 enterprise clients
- Maintained and optimized 4 client-facing React applications

Software Developer - Erciyes University - IT Dept. *(Kayseri)* Mar 2021 - Aug 2021
- Built a system that automatically creates university email accounts (Go, PostgreSQL, MSSQL, Zimbra), replacing the manual process

PROJECTS

sesly.io - *AI Voice-Cloning Storytelling App (Live)*
- A mobile app that clones a parent's voice to narrate personalized children's stories - sole developer with full-stack + DevOps
- Developed the web platform (React, Vite), admin panel (Next.js), backend API (NestJS) and end-to-end CI/CD, managing all infrastructure
- Publicly released; iOS version coming soon (waitlist at sesly.io)
  (React Native, Expo, Firebase, NestJS, React, Next.js, Cartesia AI, GitHub Actions, Figma)

Gozcu AI - *Real-Time Computer Vision Analytics Platform*
- Built the AI Sensor, Raw Data Processor and Rule Engine for a camera-based AI surveillance platform processing live RTSP streams

- AI Sensor: Rebuilt the legacy thread-per-camera YOLOv8 service as an asyncio pipeline running YOLO11 on NVIDIA Triton (TensorRT FP16) and publishing detections to Redis Streams, with live camera hot-reload and auto-reconnect
- Raw Data Processor: Designed for high-throughput ingestion via PostgreSQL COPY bulk inserts into TimescaleDB hypertables, idempotent SQL aggregations across per-class, per-region, and cross-dimensional stats
- Rule Engine: event-driven evaluator for 4 alert types (Presence, Absence, Count, Combination) with exponential-decay scoring to handle detection noise from live camera feeds
  (Python 3.12, asyncio, NVIDIA Triton, TensorRT, YOLO11, Redis Streams, TimescaleDB, asyncpg, Pydantic v2, httpx, Alembic, Docker)

EDUCATION

B.Sc. Computer Engineering - Erciyes University 2017 - 2022
Erasmus+ Exchange - Politehnica University of Bucharest 2019 - 2020

LANGUAGES

Turkish (Native) - **English** (Upper-Intermediate - B2+)
